

Homework Assignment #3.....database

Building a Custom Data Model

The class selects a business to model:

- Run the business
- Compute Revenue
- Compute Costs
- Track History
- And more

Grading is like a competitive bid. The data models that are the most comprehensive and flexible get the highest grades.

Turn in the relationship diagram from DB Visualizer as a PDF / High resolution JPG and all of the create statements.

Make sure to add the necessary Primary and Foreign Keys.
