

Database Assignment 2

- 1) Installed SQLite and DBVisualizer Pro.
- 2) DrexeRaceWalking database created.

- 3) SQL statements used to create your table.

```
CREATE TABLE
Observer
(
IDObserver INTEGER,
FirstName TEXT,
LastName TEXT,
CONSTRAINT PrimaryKey PRIMARY KEY (IDObserver)
);
-----

CREATE TABLE
VideoObservation
(
ID INTEGER,
IDRace INTEGER,
BibNumber INTEGER,
IDObserver INTEGER,
LOCAverage NUMERIC,
LOC1 NUMERIC,
LOC2 NUMERIC,
LOC3 NUMERIC,
LOC4 NUMERIC,
KneeAngle NUMERIC,
Comment TEXT,
VideoFile TEXT,
TOD TEXT,
CONSTRAINT PrimaryKey PRIMARY KEY (ID),
CONSTRAINT VideoObservation_fk1 FOREIGN KEY (IDRace, BibNumber) REFERENCES "Bib"
("IDRace"
, "BibNumber"),
CONSTRAINT VideoObservation_fk2 FOREIGN KEY (IDObserver) REFERENCES "Observer"
("IDObserver")
);
-----

CREATE TABLE
Athlete
(
IDAthlete INTEGER NOT NULL,
FirstName TEXT NOT NULL,
LastName TEXT NOT NULL,
CountryCode TEXT NOT NULL,
CONSTRAINT PrimaryKey PRIMARY KEY (IDAthlete)
);
-----

ALTER TABLE observer ALTER COLUMN FirstName TEXT;
-----

CREATE TABLE
Bib
(
IDRace INTEGER NOT NULL,
IDAthlete INTEGER NOT NULL,
BibNumber INTEGER NOT NULL,
FinishingTime TEXT NOT NULL,
```

```

FinishingPlace INTEGER NOT NULL,
Finished TEXT NOT NULL,
CONSTRAINT PrimaryKey PRIMARY KEY (IDRace, BibNumber),
CONSTRAINT Bib_fk1 FOREIGN KEY (IDRace) REFERENCES "Race" ("IDRace"),
CONSTRAINT Bib_fk2 FOREIGN KEY (IDAthlete) REFERENCES "Athlete" ("IDAthlete")
);
-----
CREATE TABLE
    Event
    (
        IDEvent INTEGER NOT NULL,
        Event TEXT NOT NULL,
        City TEXT NOT NULL,
        Country TEXT NOT NULL,
        CONSTRAINT PrimaryKey PRIMARY KEY (IDEvent)
    );
-----
CREATE TABLE
    Judge
    (
        IDJudge INTEGER NOT NULL,
        FirstName TEXT NOT NULL,
        LastName TEXT NOT NULL,
        CountryCode TEXT NOT NULL,
        CONSTRAINT PrimaryKey PRIMARY KEY (IDJudge)
    );
-----
CREATE TABLE
    JudgeCall
    (
        IDRace INTEGER NOT NULL,
        IDJudge INTEGER NOT NULL,
        Color TEXT NOT NULL,
        Infraction TEXT NOT NULL,
        TOD TEXT NOT NULL,
        BibNumber INTEGER NOT NULL,
        CONSTRAINT PrimaryKey PRIMARY KEY (IDRace, IDJudge, Color, Infraction,
        BibNumber),
        CONSTRAINT JudgeCall_fk1 FOREIGN KEY (IDRace, BibNumber) REFERENCES "Bib"
        ("IDRace",
        "BibNumber"),
        CONSTRAINT JudgeCall_fk2 FOREIGN KEY (IDJudge) REFERENCES "Judge" ("IDJudge")
    );
-----
CREATE TABLE
    Race
    (
        IDRace INTEGER NOT NULL,
        IDEvent INTEGER NOT NULL,
        RaceDate TEXT NOT NULL,
        StartTime TEXT NOT NULL,
        Distance INTEGER NOT NULL,
        DistanceUnits TEXT NOT NULL,
        Gender TEXT NOT NULL,
        CONSTRAINT PrimaryKey PRIMARY KEY (IDRace, IDEvent),
        CONSTRAINT Race_fk1 FOREIGN KEY (IDEvent) REFERENCES "Event" ("IDEvent")
    );
-----
CREATE TABLE
    RaceJudge
    (
        IDRace INTEGER NOT NULL,
        IDJudge INTEGER NOT NULL,
        CONSTRAINT PrimaryKey PRIMARY KEY (IDRace, IDJudge),
        CONSTRAINT RaceJudge_fk1 FOREIGN KEY (IDRace) REFERENCES "Race" ("IDRace"),

```

```
CONSTRAINT RaceJudge_fk2 FOREIGN KEY (IDJudge) REFERENCES "Judge" ("IDJudge")
);
```

4) Loaded all the data for each table.

Manually entered data for Event and Race tables.

Table: Event				
DrexelRaceWalking/Schema/Tables/Event				
Info	Columns	Data	Row Count	Primary Key
Filter:				
IDEvent	Event	City	Country	
1	1 Boonta Eve Classic	Mos Espa	Tatooine	

Table: Race						
DrexelRaceWalking/Schema/Tables/Race						
Info	Columns	Data	Row Count	Primary Key	Indexes	Row Id
Filter:						
IDRace	IDEvent	RaceDate	StartTime	Distance	DistanceUnits	Gender
1	1	1 2023-08-04	7:00 AM	35 km		MF
2	2	1 2023-08-19	10:50 AM	20 km		M
3	3	1 2023-08-20	7:15 AM	20 km		F

Data loaded from spreadsheets : Athlete, Bib, Judge, JudgeCall, Observer, RaceJudge, and VideoObservation.

Table: Athlete					
DrexelRaceWalking/Schema/Tables/Athlete					
Info	Columns	Data	Row Count	Primary Key	
Filter:					
IDAthlete	FirstName	LastName	CountryCode	Gender	
1	1 Lillie	Gill	FRA	F	
2	2 Lyla	Suarez	ITA	F	
3	3 Gwendolyn	French	MEX	F	
4	4 Mercy	Schroeder	LTU	F	
5	5 Iliana	Velazquez	AUS	F	
6	6 Paula	Hudson	KAZ	F	
7	7 Rayne	Charles	SVK	F	
8	8 Laylah	Livingston	USA	F	
9	9 Kian	Carr	SWE	F	
10	10 Lucca	Sellers	ECU	F	

Table: Bib						
DrexelRaceWalking/Schema/Tables/Bib						
Info	Columns	Data	Row Count	Primary Key	Indexes	Row Id
Filter:						
IDRace	IDAthlete	BibNumber	FinishingTime	FinishingPlace	Finished	
1	1	21	102 1899-12-31 02:57:55		21 Yes	
2	1	4	106 1899-12-31 02:44:40		4 Yes	
3	1	36	107 1899-12-31 03:16:11		36 Yes

5) Anonymize the data:-

Data anonymizing is the process of protecting the personal data information so that when data is exchanged or shared, no personal information is revealed. The data is altered in such a way so that the integrity of the data is maintained. It is necessary to anonymize data when we work with data containing confidential information and when collaborating with other people or sharing data.

Few methods are 1) Masking i.e. hiding data with altered values 2) Pseudonymization i.e. data de-identification that substitutes private identifiers 3) Generalization i.e. excluding some data purposely to make it less identifiable 4) Data swapping i.e. rearranges dataset attribute values so that they do not amount to the original information.

We need to anonymize the tables that contain the personal data, in our case we need to be anonymize Judge, Athlete, Observer tables, as these tables containing personal details. Here we can use the easiest method of anonymizing i.e. masking.

Tables to anonymize:

Event Table anonymized :-

Rename the "IDEvent" attribute to "EventID"

Replace the actual event names, cities, and countries with generic names or codes.

Anonymized Event Table:

EventID	EventName	City	Country
1	Event1	City1	Country1

```
ALTER TABLE Event RENAME COLUMN IDEvent TO EventID;
```

```
UPDATE TABLE Event SET (EventName = EventName & EventID, City = City & EventID, Country = Country & EventID);
```

Race Table anonymized :-

Rename the "IDRace" attribute to "RaceID"

Anonymized table

RaceID	EventID	RaceDate	StartTime	Distance	DistanceUnits	Gender
1	1	2023-08-04	7:00 AM	35	km	MF
2	1	2023-08-19	10:50 AM	20	km	M
3	1	2023-08-20	7:15 AM	20	km	F

```
ALTER TABLE Race RENAME COLUMN IDEvent TO EventID;
```

```
ALTER TABLE Race RENAME COLUMN IDRace TO RaceID;
```

Anonymization of Other Tables (Athlete, Judge, Observer):

For tables referencing the Event and Race tables, similar steps to anonymize can be used..

Renaming foreign keys (EventID, RaceID) in these tables to maintain consistency with the anonymized Event and Race tables.

Anonymized Example (Athlete Table):

AthleteID	RaceID	Name	Age	Gender
1	1	Athlete1	25	M
2	2	Athlete2	28	F

```
ALTER TABLE Athlete RENAME COLUMN IDAthlete TO IDAthlete;
```

```
ALTER TABLE Athlete RENAME COLUMN IDRace TO RaceID;
```

```
UPDATE TABLE Athlete SET (Name = Athlete & AthleteID);
```
